PROJECTS

World News - https://vishakh-kumar.github.io/world-news/
- News app searches for the top 10 trending news through API pull
- Created Wireframe for the app
- Used HTML5, CSS3 to create the front page of the web app
- Used JavaScript and jQuery to create the search box and the content display
- JQuery was used for API pull from **https://gnews.io/api/**
- Applied Git throughout the process for version control and tested features

Travel Log - https://v-travel-log.herokuapp.com/
- A full stack travel log with the ability to share and store travel blog data
- Created Wireframe for the app on **www.invisionapp.com**
- Technologies used are Express, CSS3. JavaScript, HTML5, MongoDb, Heroku, GitHub
- MongoDb is used to store blogger and blog data
- Firebase is used for authentication
- Git is used for version control and Express to build frontend and backend for the app
- Heroku is used for deployment

Grocery List - https://mystifying-kilby-d16d5d.netlify.app/
- A full stack application to list the groceries needed, with clickable items to check for availability of the product in Walmart, Target and Kroger
- Wireframe using **www.invisionapp.com**
- Technologies used are React, Express, HTML5, CSS3, JavaScript, MongoDb, Heroku, Netlify, GitHub
- Express is used for building the backend with MongoDb to store the data and deployed on Heroic
- React is used for the frontend and deployed on Netlify
- Firebase is used for authentication
- Git is used for version control

BeanStalk - https://beanstalk-app.herokuapp.com/
- Group project to build a full stack application using Ruby as backend and React as frontend with the help of bootstrap.
- Beanstalk uses authentication to sign in and create users.
- App supports image upload with the help of Cloudinary.

- GitHub is used for version control and monitoring commits from each contributor

Books App - https://expo.dev/@vishakhkumar/Project5?release-channel=staging
- Books App is a mobile application developed with Express for backend and React Native for frontend.
- Currently the app is compatible with IOS devices.
- Expo is used to publish the app and also to install dependencies
- Books App features authentication and API pull from Google Books API
